Job Market Paper

“Theft, Trade and Social Order”

In the absence of external institutions that protect property rights, what conditions are required for peaceful exchange? In equilibrium, the economy distributes goods by power rather than productivity; trade exists only when the distribution the market would produce happens to coincide with the distribution coercive power would produce.

Education

University of Arizona

Ph.D. Economics, expected 2027

Dissertation Committee:

Price Fishback (Co-Chair)

Charles Noussair

Peter Vandershraaf (Co-Chair)

Laurent Mathevet

Utah State University

M.S. Economics, 2022

Brigham Young University

B.A. Economics, 1996

Working Papers

- “Theft, Trade and Social Order” (Job Market Paper)
- “Perverse Incentives in Policing” (draft available)

Works in Progress

- “Crime and Poverty”

Publications

- Pope, C. Arden III, Randy W. Hill, and G. Martin Villegas. “Particulate Air Pollution and Daily Mortality on Utah’s Wasatch Front.” *Environmental Health Perspectives*, vol. 107, no. 7, July 1999, pp. 567–573.

Teaching Experience

Instructor of Record

University of Arizona

ECON 407 — *Economics of Strategy*

Co-Instructor · Spring 2026

ECON 303 — *Economics of Crime*

Instructor · Fall 2024

Teaching Assistant

University of Arizona

- Math Camp for Incoming Ph.D. Students
- ECON 338 — Law and Economics
- ECON 443 — International Trade Theory
- ECON 407 — Economics of Strategy
- ECON 332 — Intermediate Macroeconomics
- ECON 361 — Intermediate Microeconomics
- ECON 300 — Microeconomic Analysis for Business Decisions
- BUS ADMIN 276 — Statistical Inference in Management
- ECON 307 — Economic History of the United States

Professional Experience (Pre-PhD)

Product Manager, Sanctions Screening

Citibank, 2010–2018

- Directed a multi-year effort to reconcile a single global sanctions-screening standard with each jurisdiction's own local regulatory requirements across one of the world's most complex global banking organizations.
- Built alignment among compliance, technology, and business-line stakeholders to implement that standard, despite widely varying incentives across the bank to embrace it.

Forecasting Manager / Risk Manager

American Express, 2001–2008

- Led a team in forecasting and operations analysis for a national card-services unit, then developed underwriting and account-risk criteria applied through automated decision processes.
- Identified overlooked opportunities within existing marketing, operations, and risk-management processes, and translated counterintuitive analytical findings into changes adopted by business partners over their initial skepticism.

Invited Talks

“Theft, Trade and Social Order”

- Arizona State University, Department of Economics (job market paper exchange) — October 2026 (scheduled)
- Utah State University, Department of Economics — September 2026
- Brigham Young University, Department of Economics — September 2026
